

ENVIRONMENTAL POLICY STATEMENT

Welwood Special Projects Ltd are committed to eliminating or reducing the environmental impact as a result of their undertakings, so far as is reasonably practicable, by :-

- Providing resources in the way of a Management Structure to identify all environmental issues relevant to their work.
- Planning the most appropriate procedure to address each identified issue.
- Communicating the company procedures for each issue.
- Implementing the agreed measures throughout all work locations.
- Monitoring and reviewing the environmental performance of this policy at regular intervals.
- To continually develop an awareness approach to the management of the Company, recognising also that efficient management of energy and resources in materials cuts cost and creates competitive advantages.
- To continue to develop and practise in-house environmentally caring policies covering its use of premises, sites, plant and other assets.
- The company will also continue to promote energy efficiency and sound environmentally sensitive practices.

To deliver against this Policy **Welwood Special Projects Ltd** will ensure that:

- It is communicated to and understood by all working for and on our behalf.
- Develop environmental awareness of employees through effective education and training.
- We will comply with all current Environmental & Pollution Regulations.
- Our environmental management is effective and focused upon performance improvement.
- To continually seek to advance operational techniques supported by the development and implementation of innovative management solutions.
